Lab: Code Verification and Z3 Theorem Prover

(Week 5)

Yulei Sui

School of Computer Science and Engineering

University of New South Wales, Australia

Assignment-1 Marks Released

Marks are out and let us go through some Assignment-1 issues!

Assignment-2 Spec and Code Released

Remember to `git pull` or `docker pull`!

Quiz-2 and Exercise-2

- Quiz-2 with 25 questions (5 points), **due date: 23:59 Wednesday, Week 7**
  - Logical formula and predicate logic
  - Z3's knowledge and translation rules
- Lab-Exercise-2 (5 points), **due date: 23:59 Wednesday, Week 7**
  - **Goal:** Manually translate code into z3 formulas/constraints and verify the assertions embedded in the code.
  - **Specification:**`https://github.com/SVF-tools/Software-Security-Analysis/wiki/Lab-Exercise-2`
  - **SVF Z3 APIs:** `https://github.com/SVF-tools/Software-Security-Analysis/wiki/SVF-Z3-API`
- Assignment-2 (25 points) will **start from Week 5 and due date: 23:59 Wednesday, Week 8**
  - **Goal:** automatically perform assertion-based verification for code using static symbolic execution.
  - **Specification:**`https://github.com/SVF-tools/Software-Security-Analysis/wiki/Assignment-2`

Methods to Be Implemented

You need to implement the following four functions in `Assignment-2.cpp`:

- `SSE::reachability`
- `SSE::collectAndTranslatePath`
- `SSE::handleCall`
- `SSE::handleRet`
- `SSE::handleNonBranch`
- `SSE::handleBranch`
- The required implementation parts are indicated with TODO comments and you only need to fill up the code template if a method is partially implemented.
